Conflict Mineral Statement

As a supplier to worldwide markets, Baker and Finnemore Limited is aware of our obligations with regard to laws and regulations relating to Conflict Minerals, specifically the Dodd-Frank Wall Street Reform & consumer protection act, Section 1502

Baker & Finnemore does not directly source or process conflict minerals such as Tin, Tantalum, Tungsten or Gold.

Only Tin, in the form of a mechanically deposited Zinc/Tin coating is a feature of some items, if so specified by the customer.

As part of our reasonable due diligence, Baker & Finnemore has contacted the single supplier of the coating, within our supply chain, so as to verify their continued compliance with the regulations.

Based on the information received thus far we declare that those of our products that contain conflict minerals are sourced from conflict free areas.

Yours Sincerely

S.D.Price.
